Contents of Vol. 187

Issue 1

Electronics and Optics

Electronic transport in weakly pyrolysed plasma-polymerized acrylonitrile films 1
J. Tyczkowski and J. Sielski (Lodz, Poland)

Pd/Ge ohmic contacts for GaAs metal–semiconductor field effect transistors: technology and performance 9
A. Paccagnella (Mesiano, Italy), L. C. Wang (La Jolla, CA, U.S.A.), C. Canali (Padova, Italy), G. Castellaneta (Valenzano, Italy), M. Dapor (Povo, Italy), G. Donzelli (Vimercate, Italy), E. Zanoni (Padova, Italy) and S. S. Lau (La Jolla, CA, U.S.A.)

Schottky contacts on rapidly thermally annealed GaAs 19
T. S. Kalkur (Colorado Springs, CO, U.S.A.) and Y. C. Lu (Piscataway, NJ, U.S.A.)

Preparation and Characterization

Pure and mixed titanium, niobium and vanadium oxides as sputtered thick and thin films: crystallographic properties and phase transitions between 300 and 1800 K
I: X-ray diffraction investigations of thick films. 25
M. Gasgnier (Meudon-Bellevue, France), F. Lagnel, B. Poumellec and J. F. Marucco (Orsay, France)

Pure and mixed titanium, niobum and vanadium as sputtered thick and thin films: crystallographic properties and phase transitions between 300 and 1800 K
II: Electron microscopy investigations of thin films 39
M. Gasgnier (Meudon-Bellevue, France), F. Lagnel, B. Poumellec and J. F. Marucco (Orsay, France)

Deposition and properties of germanium–carbon alloy films produced from tetraethylgermanium in an r.f. discharge 51
M. Gazicki, K. Pirker, R. Schallauer, W. Fallmann, F. Olcaytug, G. Urban, A. Jachimowicz and F. Kohl (Vienna, Austria)

Structure of ion-plated amorphous hydrogenated carbon films investigated by electron energy loss spectroscopy 65
I. Mühling, K. Bewilogua and K. Breuer (Karl-Marx-Stadt, G.D.R.)

D.c. reactive magnetron sputtering of silicon in hydrogen at low substrate temperatures 77
J. N. Avaritsiotis and E. Roditi (Athens, Greece)

Microstructures and magnetic properties of Co/Cu layered films prepared by evaporation 91
K. Yoshii, N. Imada, S. Inoue and H. Kawabe (Osaka, Japan)

Heterogeneous Si_3N_4 growth during SiN_x film deposition and thermal nitridation of Si(100): an X-ray photoemission spectroscopy study 101
J. L. Bischoff, F. Lutz, L. Kubler and D. Bolmont (Mulhouse, France)

The orientation and morphology of niobium deposits on Ni{111} substrates. 111
H. L. Gaigher and N. G. van der Berg (Pretoria, South Africa)

Range profile of 50–400 keV mercury ions in cobalt films. 121
K.-M. Wang, B.-R. Shi, J.-T. Liu, X.-D. Liu, R.-Z. Zhang and W.-X. Zhang (Shandong, China)

Sputtered AlN films for semiconductor lasers 127
D. Wang, L. Guo, S. Zhu, Z. Zhang and J. Yu (Beijing, China)

Observation of gold thin film growth with reflection electron microscopy 133
T. Jach (Gaithersburg, MD, U.S.A.), G. Hembree (Tempe, AZ, U.S.A.) and L. B. Holdeman (Clarksburg, MD, U.S.A.)

Langmuir–Blodgett and Related Films

Bis(diacetylene)s
I: Langmuir–Blodgett films 141
F. R. Ahmed, E. G. Wilson and G. P. Moss (London, U.K.)

Metals–insulator–semiconductor structure with a polymerized Langmuir–Blodgett film of a styrene functionalized surfactant 155
Y. Shen, C. Boragno, R. Rolandi and U. Valbusa (Genoa, Italy)

Deposition of thin films of the donor:acceptor complex anthracene:pyromellitic dianhydride by double-source evaporation of the components 165
M. Yudasaka and N. Karl (Stuttgart, F.R.G.)

Condensed Matter Film Behaviour

Analogy between electrical and structural properties of electron-beam-deposited SnO_2 171
M. H. Madhusudhana Reddy, S. R. Jawalekar and A. N. Chandorkar (Bombay, India)

Post-deposition annealing effects in electron-beam-evaporated indium tin oxide thin films 179
H.-J. Krokoszinski and R. Oesterlein (Heidelberg, F.R.G.)

Generation and annihilation of thermal donors in silicon thin films formed by oxygen implantation 187
F. Vettese, J. Sicart, J. L. Robert (Montpellier, France), S. Cristoloveanu, J. Margail and C. Jaussaud (Grenoble, France)

Issue 2

Electronics and Optics

Electrical characteristics of SnO_2-based thick film resistors loaded with $SnCl_2$. 199
M. R. Kadam, N. Vittal, R. N. Karekar and R. C. Aiyer (Pune, India)

Calculation of the multilayer antireflection coating effectiveness for a planar surface-emitting light-emitting diode by taking into account the oblique ray incidence. 209
D. A. Minkov and D. K. Stoeva (Botevgrad, Bulgaria)

A study of the impedance characteristics of thin oxide films on bismuth 221
F. El-Taib Heakal, A. A. Mazhar and M. A. Ameer (Giza, Egypt)

Fluoride/semiconductor and semiconductor/fluoride/semiconductor heteroepitaxial structure research: a review 231
S. Sinharoy (Pittsburgh, PA, U.S.A.)

Electroluminescence in $CdIn_2S_4$ thin films 245
S. Fafard and E. Fortin (Ottawa, Ontario, Canada)

Transport properties of flash-evaporated $(B_{1-x}Sb_x)_2Te_3$ films
I: Optimization of film properties 253
F. Völklein, V. Baier, U. Dillner and E. Kessler (Jena, G.D.R.)

Transport properties of flash-evaporated $(Bi_{1-x}Sb_x)_2Te_3$ films
II: Theoretical analysis 263
U. Dillner and F. Völklein (Jena, G.D.R.)

Structure-related bulk losses in ZrO_2 optical thin films 275
A. Duparré, E. Welsch, H.-G. Walther, N. Kaiser, H. Müller, E. Hacker, H. Lauth, J. Meyer and P. Weissbrodt (Jena, G.D.R.)

Two- and three-layer dielectric systems with the same high reflectance bands 289
L. Jankowiak and Z. Leś (Krakow, Poland)

Metallurgical and Protective Layers

The effect of the interfacial strength on the mechanical properties of aluminum films 295
T. W. Wu, M. Moshref and P. S. Alexopoulos (San Jose, CA, U.S.A.)

Preparation and Characterization

Sulfuration thermique de InP sous pression réduite de vapeur de soufre 309
S. Rakib, M. Gendry, P. Klopfenstein (Montpellier, France), R. Saoudi (Villeurbanne, France) and J. Durand (Montpellier, France)

Preparation of ZnS:Ag,Cl thin films emitting blue luminescence 323
Y. Nakanishi, G. Shimaoka, H. Tatsuoka and H. Kuwabara (Hamamatsu, Japan)

Calculation and measurement of layer thickness distribution 331
P. F. Gu (Hangzhou, China)

Langmuir–Blodgett and Related Films

Conducting Langmuir–Blodgett films of mixture of two charge transfer complexes 337
V. I. Troitsky, T. S. Berzina, P. S. Sotnikov, T. V. Ujinova (Moscow, U.S.S.R.) and O. Ya. Neiland (Riga, U.S.S.R.)

Surface plasmon microscopy of lipid layers 349
W. Hickel and W. Knoll (Mainz, F.R.G.)

The structure of Langmuir–Blodgett films from substituted phthalocyaninato-polysiloxanes 357
T. Sauer, T. Arndt, D. N. Batchelder, A. A. Kalachev and G. Wegner (Mainz, F.R.G.)

Condensed Matter Film Behaviour

A ballistic deposition model for films evaporated over topography 375
R. N. Tait, T. Smy and M. J. Brett (Edmonton, Alberta, Canada)

Letters

Crystalline characterization and colouration of $KMgF_3$ films L1
G. Baldacchini, R. M. Montereali, L. C. Scavarda do Carmo (Frascati, Italy), S. Martelli (S. Maria di Galeria, Italy), A. Scacco and F. Somma (Rome, Italy)

The physical description of films coating quartz resonators L7
K. K. Kanazawa (San Jose, CA, U.S.A.)

Reply to "The physical description of films coating quartz resonators" by K. Keiji Kanazawa L11
V. M. Mecea (Cluj-Napoca, Romania)

Author Index 385
